

Claims

1. Clothing used in the treatment and reduction of the pains characterized with a band (2), one or more conductive wire (3) which can be fixed onto a band and two or more magnets (5) fixed onto the said band (2).

5 2. Clothing as defined in Claim 1 characterized with a band (2) on the waist part.

3. Clothing as defined in any of the Claims above characterized with an elastic band (2).

10 4. Clothing as defined in any of the Claims above characterized with a wire (3) having the thickness of a thread.

5 5. Clothing as defined in any of the Claims above characterized with a wire (3) having the width of a strip.

15 6. Clothing as defined in any of the Claims above characterized with a wire (3) which is weaved with another thread in the band.

7. Clothing as defined in Claim 6 characterized with a band made of a thread having a thickness more than the wire.

20 8. Clothing as defined in Claims 1-5 characterized with a wire (3) which is adhered on the band.

9. Clothing as defined in any of the Claims above characterized with a band comprising a wire (3) extending along the entire length.

25 10. Clothing as defined in Claims 1-8 characterized with a band comprising a wire extending to an extent.

11. Clothing as defined in any of the Claims above characterized with a wire covered by an insulation material.

12. Clothing as defined in any of the Claims above characterized with a band having an open end.

30 13. Clothing as defined in any of the Claims above

characterized with a wire made of a ductile metal having a high coefficient.

14. Clothing as defined in any of the Claims above characterized with a wire attached to the band in a zigzag way.

5 15. Clothing as defined in any of the Claims above characterized with a wire attached to the band in a wavy way.

16. Clothing as defined in Claims 1-15 characterized with wires having serial connections.

10 17. Clothing as defined in any of the Claims above characterized with wires having parallel connections.

18. Clothing as defined in any of the Claims above comprising two or more pockets (4) for the placement of the magnets (5).

15 19. Clothing as defined in Claim 18 characterized with a pocket formed by being folded and sewed from the ends of the band.

20. Clothing as defined in Claim 18 characterized with a pocket formed by the addition of another fabric on the band.

21. Clothing as defined in any of the Claims above characterized with a magnet having 0.5-13000 Gauss.

22. Clothing as defined in any of the Claims above characterized with a magnet having a thickness of 0.05-10 mm.

23. Clothing as defined in any of the Claims above characterized with a magnet in a metal nucleus form induced by an electric source.

25 24. Clothing as defined in any of the Claims above characterized with the magnets having the same poles (polarizations).

25. Clothing as defined in Claims 1-23 characterized with the magnets having different poles (polarizations).

26. Clothing as defined in any of the Claims above characterized with a band having a distance of 0.5-50 mm between its open ends.

5 27. Clothing as defined in Claim 26 characterized with a band comprising a holder (6) for holding the open ends together.

28. Clothing as defined in Claims 26 and 27 characterized with a holder made of plastic material.

10 29. Clothing as defined in Claims 26 and 28 characterized with a band comprising a holder in a belt form whose width can be adjusted.

30. Clothing as defined in any of the Claims above having a form of underpants and being made of a disposable material.

31. Clothing as defined in Claim 30 being made of a cellulose and/or plastic base material.

15 32. Clothing as defined in Claims 31 and 32 comprising a hygienic pad on its crotch part.
